SELF-QUARANTINE CHECKLIST

Why am I in self-quarantine?

You have been in close contact with someone who has Coronavirus (COVID-19) and even though you feel well now, it is possible that you are also infected. It can take 2 to 14 days to show symptoms. You have been asked to self-quarantine in case you are infected so that you don't pass on the infection to anyone else.

- Keep your distance.** Stay in your bedroom and use a bathroom separate from the one used by other members of your household, if possible.
- Wear a face mask when around others and try to stay at least 6 feet away.**
- Have someone else in the home prepare meals** and leave them outside your bedroom door.
- Don't share bedding, towels, dishes, or water bottles with others.** If something is shared, wash it with soap and water before each use by a separate person.
- Do not leave your home (unless necessary for medical care).** Ask family, friends, or community groups to help with needs by leaving supplies outside your door.
- Limit visitors to those who are necessary.** Have them wash their hands when they enter and leave; wear a face mask and stay at least 6 feet away. If they have symptoms of fever, cough, or difficulty breathing, ask them not to come.
- Wipe down high-touch areas every day with a disinfectant.** This includes: doorknobs, light switches, phones, remote controls, appliance, sink, toilet, countertops, etc.
- Limit contact with pets.** If you do interact with pets, wear a facemask, and wash your hands before and after.
